

LITHIUM TECHNOLOGY

Battery systems for the future

STRONG.

Drive systems with powerful high-tech energy packages

EFFICIENT.

Fast charging reduces your machine's downtime

INTELLIGENT.

Permanent monitoring and control through remote monitoring

INTELLIGENT & ECONOMICAL

Lithium batteries: secure high-tech energy packages

LITHIUM BATTERIES

High-performance with long

BULMOR LITHIUM BATTERY SYSTEM

*Partial rapid charging
Emission-free charging
Maintenance-free
Normal infrastructure
Increased security*

For powerful performance, BULMOR EQ sideloaders are optionally equipped with lithium LFP batteries. Exactly matched components mean that the EQ sideloaders offer maximum performance and high cost-effectiveness at the same time.

Safety is one of the strengths of our Flash Battery batteries. This means we use the safest technology available on the market.

Flash Battery batteries are equipped with a safety valve which, in the event of an internal anomaly, releases only the internal electrolyte – meaning the temperature never exceeds 80 degrees.

Even if short-circuited, a Flash Battery remains safe.

Fully charged after 2 hours

Over 4000 charging cycles

No costs for maintenance and infrastructure

Partial charging extends operating time

4x longer operating time than lead-acid battery

Remote control system monitors all functions

Longer service life

bulmor
strong sideloader solutions

Typisch BULMOR- more than others.

Every machine in the BULMOR fleet stands for power and robustness, as well as efficiency and safety. Every machine is created using the experience and genes of more than 45 years of experience in the field of forklift construction. With this strength, coupled with today's modern technical know-how, we build smart solutions for strong operations.
