FLEET MANAGEMENT

CHECKS.

Securing against
long-term damage

INTELLIGENT.

Comprehensive information
on your machine

OVERVIEW.

For optimised
material flow

INTELLIGENT & ECONOMICAL

Fleet management optimises costs and material flow.

MYBULMOR YOUR ADVANTAGES:

- Increase energy efficiency
- Optimise maintenance
- Improve forklift use
- Minimise damage
- Extend operating times
- Autom. software updates

DIGITAL
Optimises

mybulmor

mybulmor is integrated into all EQ sideloaders as a plug-and-play feature and provides real-time data from the operating location via the cloud, where it is processed and made available for decision-making via a dashboard.

This gives you an overview at all times of planned service intervals, consumption and performance or wilful mishandling of your forklifts.

mybulmor provides key performance indicators to reduce costs and increase efficiency.

(i) No infrastructure required for transmission via the mobile network

Your data is transferred to the database via the mobile network. No hardware is required on the premises for this. The stability of the connection depends on the network of the mobile phone provider.

Overview of consumption and performance

Maintenance plan and service monitoring

Simple vehicle management

Accident reduction

Planned fleet deployment and control analyses

Real-time monitoring and verifiability

VEHICLE CHECK

reduces maintenance costs and reduces damage

bulmor
strong sideloader solutions

Typical BULMOR- more than others.

Every machine in the BULMOR fleet stands for power and robustness, as well as efficiency and safety. Every machine is created using the experience and genes of more than 45 years of experience in the field of forklift construction. With this strength, coupled with today's modern technical know-how, we build smart solutions for strong operations.
